

# How-to: Turn on the Confidence Monitor

## Introduction

The “confidence monitor” is the screen above the AV desk which is visible to people on the stage. It can be used to mirror the main screen or to display other information.

## Touch Screen

This screen is turned on using the AMX touch-screen unit to the right of the iMac.

## Remote Control

If it is not possible to use the touch screen, or the screen is not responding to the touch screen, it is also possible to control it using its remote control. This is kept in the tray at the back right of the projection desk.
