

How-to: Save ProPresenter Files

Introduction

ProPresenter does sometimes crash so it is important to save regularly to ensure that any changes are not lost.

How to

To save the file click 'File' on the top menu bar and then select 'Save All'.

Alternatively, you can save by pressing Command + S.

It is best to do this every time you make a change to the file, for example after adding a new song or changing any of the cues.
