

How-to: Turn on the Reception Screen

Introduction

The "Reception screen" is the large screen in the main foyer, behind the auditorium. It allows people using the foyer sofas or serving in the foyer, to see what is happening in the auditorium. It can mirror the main screen or display the stage camera feed.

Touch Screen

At present this screen cannot be controlled using the AMX touch-screen unit.

Remote Control

This screen must be turned on using its remote control. This is kept in the tray at the back right of the projection desk.
